

## Description

Touch doorbell is a wall switch especially designed for hospitality. It is a modern solution to replace using of the common door hangers.

Touch Door Bell System consist of three parts, outside, inside and bell, a combination of functions as Bell, DND(do not disturb) and Make up room, a symbolic facility of modern hotels. It's more concise and exquisite than traditional paper hangers of DND&Please Clean.

And once DND activated by guest inside, the bell will cease to work. This intelligent function bring great convenience to users, with touch-type using and easy ON/OFF button with background light to indicate.
